

# Veka L

## KEY ADVANTAGES

- Up to 3 installation methods
- Tool-free access from the top
- Sturdiness: IP66 + IK10
- Die-cast aluminium (Cu<0.1%)
- Energy Efficient: 151 lm/W
- Up to 7 optical distributions
- Smart Ready: Designed to house both indoor and outdoor communications nodes
- Future Proof: Zhaga-compliant
- Life span L90B10 100,000h (Ta) 25°C
- Night Friendly: ULR Arrêté du 27 décembre 2018
- A presence sensor can be incorporated into the luminaire
- 3G connectivity

## DESCRIPTION

Veka is the new family of luminaires by Carandini for public street lighting. Its elegant aesthetics, latest generation LED technology and optical distributions make it a top-quality solution for urban streets, main or secondary roads, motorways, dual carriageways and car parks.

## STANDARDS / CERTIFICATES

Ta 25°C

## PHOTOMETRIC CONFIGURATIONS

7 photometric configurations are available for use in the various environments where this type of luminaire might be installed, meaning it can be adapted to suit all situations:

## DIMENSIONS

## APPLICATIONS

Public streets, main or secondary roads, motorways and dual carriageways, and car parks.

## VEKA L CHARACTERISTICS

GENERAL INFORMATION	
Sustainability	Recyclability: 95,29% Carbon footprint per use: 0,0723 kg kW/h de CO2
CE mark	Yes
ENEC Certificate	Yes
RoHS-compliant	Yes
Testing standards	LM 79-80 (all measurements at ISO17025 certified laboratory)

GENERAL CHARACTERISTICS	
Body and mounting	Pressure die-cast aluminium EN AC-44100 (LM6) with low copper content <0.1%.
Finish	Grey polyester powder coating RAL 9006 Smooth Gloss (906B). Other finishes, upon request.
Light enclosure	5mm toughened flat glass.
Exterior nuts and bolts	Stainless steel (AISI304).
General ingress protec-	IP66 (EN 60598-1 and EN 60529)
Degree of protection	IK08 (EN 62262)
Operating temperature	Ta -40°C to +50°C According to luminaire configuration.
Estimated life	L90B10 100,000 h at Ta 25°C. Light maintenance values at TM-21 based on LM-80

ELECTRICAL CHARACTERISTICS	
Electrical class	Class I or Class II
Input voltage	220 V - 240 V / 50 Hz - 60 Hz Optional 100 V- 277 V
Power factor	> 0.9
Harmonic distortion	< 10%
Overvoltage protection	Overvoltage protection (1.2/50) 10 kV. Maximum current (8/20) 10kA. Maximum voltage (L-N) 320 V. Maximum voltage (L/N-GND) 400 V. Optional overvoltage protection: 20kA, 20kV

LIGHTING CHARACTERISTICS	
Real light package	5879lm to 42.403lm (42 - 313W)
LED colour temperature	4,000 K (Neutral White, nw). 3,000 K (Warm White, ww). 2,700 K (Warm White, ww). 2,200 K (Warm White, ww).
Colour rendering	CRI>70. CRI80 upon request.
LEDs	Includes 64, 80, 96, 128 y 160 LEDs.
ULR/FHS	Entre 0,00% y 0,35%
Optics	Acrylic PMMA lenses especially designed for LEDs.
Photometric configurations	AMA1=> Throw 70° Spread 65° (Type IV) AME1=> Throw 65° Spread 15° (Type I) AME2=> Throw 70° Spread 35° (Type II) AMM1=> Throw 70° Spread 35°/50° (Type III) AMM2=> Throw 60° Spread 35° (Type II) AMM3=> Throw 75° Spread 5°/20° (Type III) AMM4=> Throw 65° Spread 20° (Type II)
LED thermal management	Heat dissipation via conduction, radiation and convection based on a design for LED technology.

## VEKA L CHARACTERISTICS

## MAINTENANCE AND ASSEMBLY

Installation and maintenance	Tool-free luminaire access system designed by Carandini. Access to the driver from the top.
Installation	PT1: Vertical installation $\varnothing$ 76 mm.* PT2: Vertical installation $\varnothing$ 60mm.* SE2: Lateral installation $\varnothing$ 49/60mm  * The PT1/ PT2 fixings shall be supplied horizontally mounted with SE for sustainability.
Mechanical adjustment	Vertical and lateral installations offer an inclination angle range of $\pm 10^\circ$ for every 2.5°.
Equipped weight	PT1: 15,2 Kg / PT2: 15 Kg SE2: 15 Kg
Wind Surf.	PT: 0,3m <sup>2</sup> SE: 0,3m <sup>2</sup>
Pressure equalisation valve	The luminaire is fitted with a valve that balances the pressure in the luminaire to prevent the build-up of condensation, thereby extending the lifetime of the components.

## MANAGEMENT AND CONTROL

Devices	1N: LED 1 level RC: Adjustable LED in head RD: Adjustable LED Protocol DALI AF: Adjustable LED Protocol 1-10 V RL: Pulse adjustable LED 2N: Dual level SR: Smart Ready D4i
Autonomous regulation	Factory-programmable regulation:  56: 50% from 00:00 to 06:00 66: 60% from 00:00 to 06:00 76: 70% from 00:00 to 06:00
CLO regulation	Percentage flow during product lifetime:  7: 70% luminous flux during luminaire lifetime. 8: 80% luminous flux during luminaire lifetime. 9: 90% luminous flux during luminaire lifetime.
Sockets	3-U: NEMA 3 pin socket with/without IP66 cover. 5-V: NEMA 5 pin socket with/without IP66 cover. 7-W: NEMA 7 pin socket with/without IP66 cover. 4-X: Upper Zhaga socket with/without IP66 cover.
Photocells	1: Photocell for Nema 3, 5 and 7 pin socket (20 lux) 2: Photocell for larger Zhaga socket (20 lux)
Node	ON: Controlux One BS: Controlux Basicrolux One

## VEKA L PHOTOGRAPHS

## LOGISTICAL INFORMATION

### VEKA L PT

Box size: 900 x 362 x 239 mm

Box weight: 15,2 kg.

Number of boxes: 14 units

American base: 1200 x 800 x 1873 mm

Stack height: 7 floors

Area occupied: 67,9%

Volume used: 63,1%

Total gross weight: 233 kg.

### VEKA L SE

Box size: 1060x 390 x 180 mm

Box weight: 15,2 kg.

Number of boxes: 18 units

American base: 1200 x 800 x 1770mm

Stack height: 9 floors

Area occupied: 86%

Volume used: 82%

Total gross weight 293 kg.

**NOTE:** By sustainability reasons PT1 & PT2 fixing accessories will be supplied assembled by side entry (SE)

## LUMINAIRE DIMMING

### By programming the driver

#### Programming profile

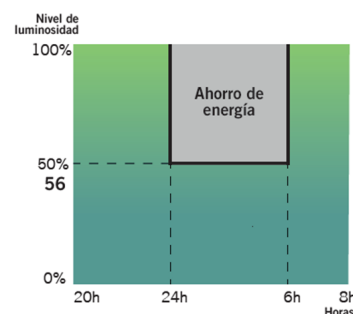

The driver can be programmed so that luminous flux is reduced from the luminaire during the least busy hours at night while always meeting the required lighting and uniformity levels.

#### Programming profile 56

From 00:00 to 06:00 the luminaire reduces its initial intensity by 50%.

Hasta un

**26%**  
de ahorro

### Using the CLO function

While taking lumen depreciation over the years into account, the driver is programmed so that it starts at a reduced level and gradually increases power over the lifetime of the luminaire. This saves energy and increases the lifetime of the system. Furthermore, the light level in the area where the luminaire is installed remains constant over time.

#### Constant luminous flux 8

Luminous flux from the luminaire at 80% to maintain light levels throughout its lifetime.

Hasta un

**10%**  
de ahorro

y se incrementa la vida de la luminaria

Graph: Luminous flux

Graph: Consumption

### By incorporating an additional device

#### Photocell

A photocell enables the luminaire to be switched on or off based on the solar light intensity detected.

This is extremely useful so the luminaires are not switched on during the day when there is still sufficient natural light.

#### Ejemplo con fotocélula de 20 lx:

Si la fotocélula detecta más de 20 lx no activará el encendido de la luminaria.

Es cuando los niveles luminicos empiezan a bajar que la fotocélula detecta 20 lx y activa el encendido de la luminaria.

## INNOVATIVE AND UPDATABLE OVER TIME (Zhaga/ ZD4i)

## Zhaga

## Zhaga — “Future Proof”

Zhaga is an industrial consortium that seeks to standardise the specifications used for interfaces between LED luminaires and light sources. The goal is to achieve interchangeability between products made by different manufacturers. Zhaga defines the testing procedures for light sources from luminaires and LEDs so that the luminaires accept the LED source.

## Zhaga D4i — “Sensor Ready”

The Zhaga consortium merged with DiiA to create one single Zhaga-D4i certificate that combines the specifications for outdoor connectivity from Version 2 of Zhaga Book 18 with the D4i specifications of Dii4 for intra-luminaire DALI.

## “BOOKS” PER APPLICATION. A PROFITABLE SOLUTION.

Z H A G A Consortium		Book 1-25 Overview by application	
	Office & Industry	Retail & Hospitality	Outdoor
Integrated LED light engines	14 2,8	17 16	
LED modules (non-integrated)	7 21 14	12 9 5 3,10	4 15 19
Drivers	13	LED set 22,23	24,25
Sensor and communication modules		20	18

The specifications indicating that a component is Zhaga can be found in a series of books that are only available to consortium members and enable designs to be produced according to the marked standard. The advantages for society are clear given that, besides reducing the consumption of resources, luminaire re-use is increased with a focus on achieving a circular economy.

## CERTIFICATION PROGRAMME

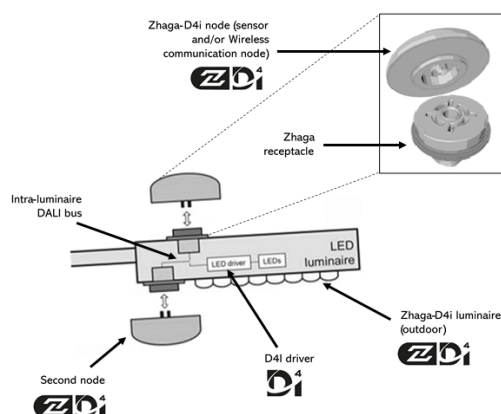

Zhaga-D4i certification covers all the essential characteristics, including automatic adjustment, digital communication, data reporting and power requirements in any single luminaire, ensuring plug-and-play interoperability for luminaires (drivers) and peripherals, such as connectivity nodes.

## STANDARDISATION AS A MEANS TO ACHIEVE SUSTAINABILITY

The Veka M luminaire has been designed to function with the latest available market-proven technology based on standards. This also enables it to meet the CARANDINI sustainability requirements and become a product ready for maintenance in the future under better guarantees while respecting the environment and society.

The luminaires marked as Zhaga are a “Future Proof” design, meaning it is based on and designed around standard Zhaga components. These components are mainly the LED modules and the drivers. The electric compartment and dissipation area for LED modules has space and additional mountings to include any driver compliant with Zhaga “Book 13” based on market driver dimensions, or any LED module compliant with Zhaga “Book 15” based on LED controller interface specifications.

This makes it possible to have a sustainable product that can be updated over time.

## CONNECTIVITY

D4i specifications take the best of the standard DALI2 protocol and adapt it to an interconnected lighting environment, but with certain limitations. Only the control devices installed in the luminaires can be combined with a Zhaga-D4i luminaire. According to the specifications, the control devices are respectively limited to an average power consumption of 2 W and 1 W.

## SMART CITY

Luminaires marked ZD4i are a “Smart Ready” design, which means they are designed to house both indoor and outdoor communication nodes through connection sockets compliant with the Zhaga “Book 18” & Zhaga-D4i standard on sensor and communication node interoperability.
